- d) Opening a web browser
70. The process of transferring data from a computer to an external device or network location is called:
- Uploading
 - Downloading
 - Sharing
 - Streaming
71. Which component of a computer is responsible for managing and executing the instructions of a computer program?
- CPU
 - GPU
 - RAM
 - Motherboard
72. Which of the following is an example of an input device that detects and records hand movements?
- Printer
 - Scanner
 - Touchscreen
 - Monitor
73. The process of compressing data to reduce its size for storage or transmission is known as:
- Input
 - Output
 - Encryption
 - Compression
74. Which type of computer memory acts as a bridge between the CPU and the larger, slower main memory?
- RAM
 - Cache Memory
 - ROM
 - Virtual Memory
75. Which of the following is responsible for managing and coordinating the resources of a computer system, such as memory, processors, and devices?
- CPU
 - Motherboard
 - Operating System
 - Hard Drive
76. The process of converting encoded or encrypted data back into its original form is called:
- Input
 - Output
 - Decryption
 - Compression
77. Which component of a computer is responsible for storing data and instructions that are frequently accessed by the CPU for quick retrieval?
- GPU
 - RAM
 - Power Supply
 - Hard Drive
78. Which type of software provides tools and utilities for managing and maintaining computer hardware and software?
- Operating System
 - Application Software
 - System Software
 - Firmware
79. Which of the following is an example of a control operation performed by a CPU?
- Playing a video game
 - Running a virus scan

c) Processing

d) Downloading

81. Which component of a computer is responsible for performing floating-point calculations and rendering graphics?

a) CPU

b) GPU

c) RAM

d) Hard Drive

82. Which of the following is an example of an output device that displays text and images on a screen?

a) Printer

b) Scanner

c) Monitor

d) Keyboard

83. The process of converting digital signals into analog signals for transmission over analog communication channels is called:

a) Input

b) Output

c) Modulation

d) Synchronization

84. Which type of computer memory is non-volatile and retains its data even when the power is turned off?

a) RAM

b) Cache Memory

c) ROM

d) Virtual Memory

85. Which of the following is responsible for managing and controlling the communication between the computer hardware and software?

a) CPU

b) Motherboard

c) Operating System

d) Hard Drive

86. The process of encoding data to prevent unauthorized access or viewing is called:

a) Encryption

b) Decoding

c) Compression

d) Encoding

87. Which component of a computer is responsible for temporarily storing data that the CPU needs to access quickly?

a) GPU

b) RAM

c) Power Supply

d) Motherboard

88. Which type of software allows users to perform specific tasks such as word processing, spreadsheet calculations, or graphic design?

a) Operating System

b) Application Software

c) System Software

d) Firmware

89. Which of the following is an example of a processing operation performed by a CPU?

- a) Printing a document
- b) Scanning a document
- c) Editing a document
- d) Sending a command to a peripheral device

140. The process of transferring data from a remote server or storage location to a computer over a network in real-time is called:

- a) Uploading
- b) Downloading
- c) Streaming
- d) Sharing

141. Which component of a computer is responsible for executing mathematical calculations and logical operations?

- a) CPU
- b) GPU
- c) RAM
- d) Motherboard

142. Which of the following is an example of an output device that prints text and images on paper using ink or toner?

- a) Printer
- b) Scanner
- c) Projector
- d) Keyboard

143. The process of transforming data into a different representation while preserving its meaning is known as:

- a) Input
- b) Output
- c) Transformation
- d) Encoding

144. Which type of computer memory is non-volatile and retains its data even when the power is turned off?

- a) RAM
- b) Cache Memory
- c) ROM
- d) Virtual Memory

145. Which of the following is responsible for managing and controlling the execution of software programs on a computer?

- a) CPU
- b) Motherboard
- c) Operating System
- d) Hard Drive

146. The process of converting analog signals into digital signals for processing and storage is called:

- a) Input
- b) Output
- c) Analog-to-digital conversion
- d) Signal modulation

147. Which component of a computer is responsible for supplying power to the other components?

- a) GPU
- b) RAM
- c) Power Supply

- a) Printing a document
- b) Scanning a document
- c) Sorting a list of names
- d) Playing a video file

150. The process of transferring data from a computer to a remote location or storage medium for backup or long-term storage is called:

- a) Uploading
- b) Downloading
- c) Archiving
- d) Sharing

151. Which component of a computer is responsible for storing frequently accessed data and instructions for faster processing?

- a) CPU
- b) GPU
- c) RAM
- d) Motherboard

152. Which of the following is an example of an input device that allows users to enter data by handwriting on a touch-sensitive surface?

- a) Printer
- b) Scanner
- c) Graphics tablet
- d) Keyboard

153. The process of combining multiple sets of data into a single unit for efficient storage and processing is known as:

- a) Input
- b) Output
- c) Integration
- d) Aggregation

154. Which type of computer memory is used as an extension of the main memory to provide additional storage capacity?

- a) RAM
- b) Cache Memory
- c) ROM
- d) Virtual Memory

155. Which of the following is responsible for managing the communication between the computer's hardware components and the software applications?

- a) CPU
- b) Motherboard
- c) Operating System
- d) Hard Drive

156. The process of converting digital signals into analog signals for output to analog devices, such as speakers or headphones, is called:

- a) Input
- b) Output
- c) Demodulation
- d) D/A conversion

157. Which component of a computer is responsible for storing

159. Which of the following is an example of a data processing operation performed by a computer?

- a) Printing a document
- b) Scanning a document
- c) Playing a music file
- d) Opening a web browser

160. The process of transferring data from a remote location or storage medium to a computer system is called:

- a) Uploading
- b) Downloading
- c) Sharing
- d) Syncing

161. Which component of a motherboard is responsible for providing power to the other components?

- a) CPU
- b) Power Supply
- c) RAM
- d) GPU

162. Which component of a motherboard is responsible for controlling and coordinating the activities of all other hardware components?

- a) CPU
- b) BIOS
- c) Southbridge
- d) Northbridge

163. Which component of a motherboard is responsible for connecting the processor to the memory and other components?

- a) Northbridge
- b) Southbridge
- c) CMOS
- d) PCI slot

164. Which component of a motherboard stores the system's Basic Input/Output System (BIOS)?

- a) CMOS
- b) Northbridge
- c) Southbridge
- d) EEPROM

165. Which component of a motherboard provides temporary storage for data that the CPU needs to access quickly?

- a) RAM
- b) ROM
- c) Cache memory
- d) CMOS

167. Which component of a motherboard handles the communication between the CPU and the memory modules?

- a) Northbridge
- b) Southbridge
- c) CMOS
- d) PCI slot

168. Which component of a motherboard provides audio and video capabilities?

- a) Southbridge
- b) BIOS
- c) Audio codec
- d) Northbridge

169. Which component of a motherboard provides expansion slots for adding additional hardware devices?

- a) PCI Express slot
- b) RAM slots
- c) CPU socket
- d) CMOS battery

170. Which component of a motherboard is responsible for storing configuration settings and maintaining the system's clock?

- a) CMOS
- b) BIOS
- c) Northbridge
- d) Southbridge

171. Which component of a motherboard is responsible for providing a connection interface between the CPU and other components?

- a) Southbridge
- b) PCI slot
- c) BIOS chip
- d) FSB (Front Side Bus)

172. Which component of a motherboard provides additional USB ports for connecting external devices?

- a) Northbridge
- b) CMOS battery
- c) Southbridge
- d) BIOS chip

173. Which component of a motherboard is responsible for storing the system's firmware and BIOS?

- a) Northbridge
- b) CMOS
- c) EPROM
- d) SATA controller

174. Which component of a motherboard provides power to the CPU?

- a) Power Supply
- b) Voltage Regulator Module (VRM)
- c) CMOS battery
- d) Northbridge

175. Which component of a motherboard is responsible for handling communication between the CPU and the graphics card?

- a) Southbridge

@ISS COACHING DELHI SUNRISE CLASSES

SERVICE, TRUST & RESULT

SUNRISE CLASSES

- b) PCIe slot
c) Northbridge
d) CMOS battery
176. Which component of a motherboard stores the computer's configuration data, including hardware settings?
a) CMOS
b) Northbridge
c) SATA controller
d) BIOS chip
177. Which component of a motherboard provides the connection interface for networking devices?
a) SATA controller
b) Ethernet port
c) USB port
d) BIOS chip
178. Which component of a motherboard is responsible for converting digital signals from the CPU into analog signals for audio output?
a) Audio codec
b) CMOS battery
c) PCI slot
d) SATA controller
179. Which component on the motherboard is responsible for managing the computer's memory and memory-related operations?
a) Northbridge
b) Southbridge
c) Memory Controller
d) BIOS Chip
180. What is the purpose of the CMOS battery on the motherboard?
a) To provide power to the CPU
b) To store the computer's firmware
c) To regulate voltage for peripheral devices
d) To maintain the computer's configuration data
181. Which of the following is a common interconnection method used to connect multiple computer units in a network?
a) USB (Universal Serial Bus)
b) HDMI (High-Definition Multimedia Interface)
c) Ethernet
d) VGA (Video Graphics Array)
182. What type of interconnection is used to connect the processor and memory modules on a computer motherboard?
a) Bus
b) Point-to-point
c) Crossbar
d) Switched
183. Which interconnection method is commonly used for connecting peripheral devices such as printers and keyboards to a computer?
a) USB (Universal Serial Bus)
b) Ethernet
c) Bluetooth
d) Firewire (IEEE 1394)
184. What is the purpose of a bridge in computer interconnection?
a) To connect two or more networks together
b) To connect the processor and memory on a motherboard
c) To connect peripheral devices to a computer

@ISS COACHING DELHI SUNRISE CLASSES

SERVICE, TRUST & RESULT

SUNRISE CLASSES

d) To connect a computer to the internet

185. Which interconnection method is commonly used to connect display devices, such as monitors, to a computer?

- a) HDMI (High-Definition Multimedia Interface)
- b) USB (Universal Serial Bus)
- c) VGA (Video Graphics Array)
- d) Thunderbolt

186. What is the primary function of the bus in a computer system?

- a) To connect the CPU and memory
- b) To provide power to the computer components
- c) To connect peripheral devices to the computer
- d) To control the overall operation of the computer

187. Which type of bus is responsible for transferring data between the CPU and memory?

- a) Address bus
- b) Data bus
- c) Control bus
- d) Expansion bus

188. What is the purpose of the address bus in a computer system?

- a) To carry instructions from the CPU to memory
- b) To carry data between the CPU and memory
- c) To carry memory addresses from the CPU to memory
- d) To control the timing of data transfer in the system

189. Which bus is responsible for transmitting control signals and

coordinating the activities of various components in a computer?

- a) Address bus
- b) Data bus
- c) Control bus
- d) Expansion bus

190. Which type of bus is used to connect peripheral devices, such as printers and keyboards, to a computer?

- a) Address bus
- b) Data bus
- c) Control bus
- d) Expansion bus

191. Which component of a computer is responsible for processing data and executing instructions?

- a) CPU
- b) GPU
- c) RAM
- d) Motherboard

192. What is the primary function of the motherboard in a computer system?

- a) Provide power to other components
- b) Store data and instructions
- c) Control input and output devices
- d) Connect and communicate between components

193. Which component of a computer is responsible for storing data and program instructions permanently?

- a) Hard Drive
- b) RAM
- c) CPU

@ISS COACHING DELHI SUNRISE CLASSES

SERVICE, TRUST & RESULT

SUNRISE CLASSES

d) Power Supply

194. Which component of a computer is responsible for displaying visual output?

- a) Monitor
- b) Keyboard
- c) Mouse
- d) Printer

195. What is the purpose of RAM (Random Access Memory) in a computer system?

- a) Store long-term data and programs
- b) Execute program instructions
- c) Provide power to other components
- d) Temporarily store data for quick access

196. Which component of a computer is responsible for controlling the flow of electricity to other components?

- a) Power Supply
- b) GPU
- c) Motherboard
- d) CPU

197. Which component of a computer is responsible for providing audio output?

- a) Speakers
- b) Microphone
- c) Sound card
- d) Hard Drive

198. What is the purpose of the graphics processing unit (GPU) in a computer system?

- a) Execute program instructions
- b) Control input and output devices

c) Provide power to other components

d) Render and display graphics

199. Which component of a computer is responsible for storing and retrieving data in a non-volatile manner?

- a) Hard Drive
- b) RAM
- c) CPU
- d) Motherboard

200. What is the function of the power supply unit in a computer system?

- a) Control input and output devices
- b) Store data and program instructions
- c) Provide power to other components
- d) Execute program instructions

201. Which of the following best describes the main idea behind Reduced Instruction Set Architecture (RISC)?

- a) Using a large number of complex instructions for efficient execution
- b) Making hardware simpler by using a few basic instructions
- c) Increasing the number of instructions per program for improved performance
- d) Minimizing the number of cycles per instruction at the cost of program length

202. Which of the following best describes the main idea behind

@ISS COACHING DELHI SUNRISE CLASSES

SERVICE, TRUST & RESULT

SUNRISE CLASSES

Complex Instruction Set Architecture (CISC)?

- a) Using a small number of simple instructions for efficient execution
- b) Making hardware simpler by using a few basic instructions
- c) Increasing the number of cycles per instruction at the cost of program length
- d) Minimizing the number of instructions per program for improved performance

203. Which approach tries to reduce the cycles per instruction at the cost of the number of instructions per program?

- a) Reduced Instruction Set Architecture (RISC)
- b) Complex Instruction Set Architecture (CISC)
- c) Both RISC and CISC
- d) Neither RISC nor CISC

204. Which approach attempts to minimize the number of instructions per program but at the cost of an increase in the number of cycles per instruction?

- a) Reduced Instruction Set Architecture (RISC)
- b) Complex Instruction Set Architecture (CISC)
- c) Both RISC and CISC
- d) Neither RISC nor CISC

205. Which characteristic is associated with RISC?

- a) Complex instruction decoding

b) Instructions larger than one-word size

- c) Instructions taking a single clock cycle to execute
- d) Less number of general-purpose registers

206. Which characteristic is associated with CISC?

- a) Simple instruction decoding
- b) Instructions coming under the size of one word
- c) Instructions taking a single clock cycle to execute
- d) More general-purpose registers

207. Which architecture allows the use of a pipeline?

- a) Reduced Instruction Set Architecture (RISC)
- b) Complex Instruction Set Architecture (CISC)
- c) Both RISC and CISC
- d) Neither RISC nor CISC

208. Which architecture requires fewer transistors due to less complex commands?

- a) Reduced Instruction Set Architecture (RISC)
- b) Complex Instruction Set Architecture (CISC)
- c) Both RISC and CISC
- d) Neither RISC nor CISC

209. In the given example of adding two 8-bit numbers, which approach divides the operation into parts?

@ISS COACHING DELHI SUNRISE CLASSES

SERVICE, TRUST & RESULT

SUNRISE CLASSES

- a) Reduced Instruction Set Architecture (RISC)
- b) Complex Instruction Set Architecture (CISC)
- c) Both RISC and CISC
- d) Neither RISC nor CISC

210. Which approach requires more memory to store longer programs?

- a) Reduced Instruction Set Architecture (RISC)
- b) Complex Instruction Set Architecture (CISC)
- c) Both RISC and CISC
- d) Neither RISC nor CISC

211. Which of the following is an advantage of RISC processors?

- a) Reduced code size
- b) More memory efficient
- c) Simpler instructions
- d) Widely used

212. RISC processors execute instructions faster than CISC processors due to:

- a) Reduced code size
- b) More memory efficiency
- c) Simpler instructions
- d) Larger user base

213. RISC processors are preferred for portable devices because they:

- a) Have a larger user base
- b) Require less memory
- c) Consume less power
- d) Execute instructions more quickly

214. Which of the following is a disadvantage of RISC processors?

- a) Slower execution
- b) More complex design
- c) Higher power consumption
- d) Increased memory usage

215. Complex instructions in CISC processors result in:

- a) Reduced code size
- b) More memory efficiency
- c) Simpler instructions
- d) Slower execution

216. CISC processors are advantageous in terms of memory efficiency because they:

- a) Have a larger user base
- b) Require less memory
- c) Execute instructions more quickly
- d) Use complex instructions

217. Which of the following is an advantage of CISC processors?

- a) Simpler instructions
- b) Reduced code size
- c) More memory efficiency
- d) Lower power consumption

218. The complexity of CISC processors makes them more difficult to:

- a) Decode instructions
- b) Execute instructions quickly
- c) Design and manufacture
- d) Store instructions in memory

219. CISC processors have a larger user base and more available software due to:

- a) Reduced code size

SERVICE, TRUST & RESULT

SUNRISE CLASSES

- b) More memory efficiency
- c) Simpler instructions
- d) Long-standing usage

220. Higher power consumption is a disadvantage associated with:

- a) RISC processors
- b) CISC processors
- c) Simpler instructions
- d) Larger user base

Here are some multiple-choice questions on the topic of microprocessors:

221. What is the function of a microprocessor?

- a) Storage of data
- b) Execution of instructions
- c) Control of peripherals
- d) All of the above

222. Which technology is commonly used to construct microprocessors?

- a) CMOS
- b) TTL
- c) PMOS
- d) FPGA

223. What is the word length of a microprocessor?

- a) The number of clock cycles required to execute an instruction
- b) The size of the memory address space
- c) The number of bits processed in a single instruction
- d) The number of transistors on the chip

224. Which factor determines the speed of execution for a microprocessor?

- a) Word length
- b) Clock speed
- c) Instruction set
- d) Memory capacity

225. Which architecture uses a small set of simple instructions executed in one clock cycle?

- a) RISC
- b) CISC
- c) EPIC
- d) FPGA

226. Which microprocessor architecture offers hundreds of instructions of variable sizes?

- a) RISC
- b) CISC
- c) EPIC
- d) FPGA

227. Which microprocessor architecture combines the best features of RISC and CISC?

- a) RISC
- b) CISC
- c) EPIC
- d) FPGA

228. Which microprocessor architecture is known for its simplicity and low cost?

- a) RISC
- b) CISC
- c) EPIC
- d) FPGA

SUNRISE CLASSES

229. Which microprocessor architecture reduces the program size and increases the overall speed of execution?
- RISC
 - CISC
 - EPIC
 - FPGA
230. Which microprocessor architecture implements parallel processing of instructions?
- RISC
 - CISC
 - EPIC
 - FPGA
231. What is an example of a audio file?
- Cat.mp3
 - Cat.avi
 - Cat.jpg
 - Cat.png
232. Which audio file is bigger?
- Car.mp3 at 25kb
 - Car.ogg at 20 kb
 - Car.avi at 20.mb
 - Car.wav. at 12 mb
233. Which of the following is not a valid file extension of an audio file?
- .mp3
 - .rar
 - .wav
 - .mid
234. Which file is usually larger and have the best quality?
- WAV
 - Ogg
 - AVI
 - MOV
235. Which audio file is the most common sound format and close to CD quality
- WAV
 - mp3
 - OGG
 - PNG
236. Which audio file is a newer format, open source, and patent free?
- MPG
 - PNG
 - OGG
 - WAV
237. Bonnie wants to animate a graphic image of a Trojan for Olympic's website. Which file format should she use?
- GIF
 - JPG
 - OGG
 - PNG
238. Which audio type is supported by only a few web browser such as Chrome 6+, Firefox 3.6+, and Opera 10+
- WAV
 - mp3
 - OGG
 - AVI
239. Which audio file is uncompressed and has a larger file size?
- OGG
 - WAV
 - WMV
 - WebM

240. Which legislation protects an author's right to make money from an audio sequence she has recorded and edited?

- a) Trademark
- b) Copyright
- c) Legal Mark
- d) Intellectual mark

241. Which audio file format is widely used for compressed music playback and streaming?

- a) WAV
- b) MP3
- c) AAC
- d) FLAC

242. Which audio file format is known for its high-quality lossless compression?

- a) WAV
- b) MP3
- c) AAC
- d) FLAC

243. Which audio file format is commonly used for CD audio tracks?

- a) WAV
- b) MP3
- c) AAC
- d) AIFF

244. Which audio file format supports multichannel audio and is commonly used for DVDs?

- a) WAV
- b) MP3
- c) AAC
- d) AC3

245. Which audio file format is widely supported by Apple devices and iTunes?

- a) WAV
- b) MP3
- c) AAC
- d) AIFF

246. Which audio file format is commonly used in professional audio production and recording?

- a) WAV
- b) MP3
- c) AAC
- d) AIFF

247. Which audio file format is known for its small file size and is commonly used for online streaming?

- a) WAV
- b) MP3
- c) AAC
- d) FLAC

248. Which audio file format is an open-source alternative to MP3, providing similar compression but with improved sound quality?

- a) WAV
- b) MP3
- c) AAC
- d) OGG

249. Which audio file format is commonly used for storing and exchanging MIDI data?

- a) WAV

- b) MP3
- c) AAC
- d) MIDI

- b) WAV
- c) VOC
- d) AIFF

250. Which audio file format is optimized for internet telephony and voice recordings?

- a) WAV
- b) MP3
- c) AAC
- d) OPUS

251. Which sound file format is commonly used for CD audio tracks?

- a) MP3
- b) WAV
- c) FLAC
- d) AAC

252. Which sound file format is known for its lossless compression and high-quality audio?

- a) MP3
- b) WAV
- c) FLAC
- d) AAC

253. Which sound file format is widely used for streaming and online distribution of music?

- a) MP3
- b) WAV
- c) FLAC
- d) OGG

254. Which sound file format is specifically designed for speech and low bit rate applications?

- a) MP3

255. Which sound file format is commonly used in Apple devices and iTunes?

- a) MP3
- b) WAV
- c) M4A
- d) FLAC

256. Which sound file format supports multichannel audio and is commonly used for DVDs?

- a) MP3
- b) WAV
- c) AC3
- d) OGG

257. Which sound file format is optimized for internet telephony and voice recordings?

- a) MP3
- b) WAV
- c) OPUS
- d) WMA

258. Which sound file format is widely supported by web browsers for audio playback?

- a) MP3
- b) WAV
- c) OGG
- d) AAC

259. Which sound file format is commonly used for MIDI (Musical Instrument Digital Interface) files?
