70. The correct answer is b) Search engine optimization (SEO) is the practice of improving the visibility and ranking of web pages in search engine results pages, enhancing their organic search traffic.

71. The correct answer is a) DSL (Digital Subscriber Line) uses a telephone line to transmit data and provide internet connectivity.

72. The correct answer is b) Cable internet connections offer high speed and bandwidth, making them suitable for activities such as streaming and gaming.

73. The correct answer is d) Wireless internet connections use radio waves to transmit data, providing flexibility and mobility.

74. The correct answer is b) Dial-up connections require a modem and a physical cable connection to establish internet access.

75. The correct answer is c) Cable internet connections utilize television cable networks to provide internet access.

76. The correct answer is d) Leased lines offer dedicated and always-on internet connections, commonly used by businesses and organizations.

77. The correct answer is c) Satellite internet connections are often used in remote areas where other types

of connections may not be available.

78. The correct answer is c) Fiber optic connections use optical fibers to transmit data at high speeds, offering excellent performance and reliability.

79. The correct answer is d) Cellular internet connections utilize cellular networks to provide internet access, commonly used in mobile devices.

80. The correct answer is d) Cellular internet connections offer mobility and can be accessed wirelessly from various locations, making them suitable for on-the-go connectivity.

81. The correct answer is a) Leased Lines offer dedicated, private, and secure connections between two locations, commonly used by businesses.

82. The correct answer is b) DSL uses telephone lines to provide high-speed internet access, suitable for both residential and business users.

83. The correct answer is c) Satellite Internet utilizes geostationary satellites to transmit and receive data signals, making it accessible in remote areas.

84. The correct answer is d) Cable Modem Broadband uses coaxial cables, often provided by cable TV providers, to offer high-speed internet access.

@ISS COACHING DELHI SUNRISE CLASSES

SUNRISE CLASSES

85. The correct answer is d) Wireless Broadband Internet uses wireless technology to transmit data signals, providing flexibility and mobility.

86. The correct answer is a) Leased Lines are known for their low latency and high reliability, making them ideal for critical business operations.

87. The correct answer is c) Satellite Internet is commonly used in remote areas where other types of connections may not be available.

88. The correct answer is a) Leased Lines provide high-speed data transmission through dedicated fiber optic cables.

89. The correct answer is c) Satellite Internet may experience signal interference due to weather conditions, affecting its reliability.

90. The correct answer is d) Cable Modem Broadband is commonly used in residential areas, utilizing existing cable TV networks to deliver high-speed internet services.

91. The correct answer is c) The internet is primarily used for accessing and sharing information from various sources.

92. The correct answer is d) In education, the internet is commonly used for sharing research papers and educational resources.

93. The correct answer is c) The internet contributes to entertainment by offering streaming services for music, movies, and TV shows.

94. The correct answer is a) Businesses use the internet for conducting financial transactions and various online operations.

95. The correct answer is b) The internet facilitates communication through instant messaging and video conferencing platforms.

96. The correct answer is d) In healthcare, the internet is utilized for providing telemedicine and online consultations.

97. The correct answer is c) E-commerce relies on the internet for online shopping platforms and transactions.

98. The correct answer is c) Social interactions are supported by the internet through social media platforms for connecting with others.

99. The correct answer is c) The internet aids in research and information gathering by providing access to online databases and resources.

100. The correct answer is c) Governance benefits from the internet by facilitating online government services and transactions.

101. The correct answer is b) Online privacy concerns arise due to the potential unauthorized access and misuse of personal information.

102. The correct answer is c) Cyberbullying can lead to emotional distress and psychological harm for the individuals targeted.

103. The correct answer is c) Online scams and frauds can result in financial loss and identity theft for unsuspecting individuals.

104. The correct answer is c) Excessive screen time and internet addiction can lead to sleep disturbances and a sedentary lifestyle.

105. The correct answer is c) Cybercrime poses a risk of unauthorized access to personal and financial information, potentially leading to various fraudulent activities.

106. The correct answer is c) Inappropriate content on the internet can expose individuals, particularly children, to explicit or harmful material.

107. The correct answer is c) Online identity theft can result in financial loss and the misuse of personal information by malicious individuals.

108. The correct answer is c) Online grooming and exploitation can make individuals vulnerable to

manipulation and harm, especially children and young adults.

109. The correct answer is b) The internet enables communication through various means such as phone calls, instant messaging, and video calling.

110. The correct answer is a) The internet facilitates communication by providing convenient and instant methods of interaction.

111. The correct answer is d) Accessing information is one of the primary uses of the internet, which is achieved by browsing websites and online databases.

112. The correct answer is c) The internet serves as a platform for disseminating information through online news websites, blogs, and other digital sources.

113. The correct answer is c) The internet plays a significant role in providing services such as online banking, e-government services, and various digital service offerings.

114. The correct answer is c) E-commerce is facilitated by the internet through online shopping platforms and electronic payment systems.

115. The correct answer is c) E-commerce on the internet offers convenience and accessibility, allowing users to shop from

anywhere and access a wide range of products.

116. The correct answer is c) Online banking utilizes the internet to provide customers with convenient access to their accounts and perform financial transactions securely.

117. The correct answer is c) Email's primary purpose is to send and receive electronic messages.

118. The correct answer is c) Email attachments can pose a risk of virus infections and malware distribution if they are infected.

119. The correct answer is c) Computer viruses typically replicate and spread through computer systems, potentially causing harm.

120. The correct answer is c) Viruses can be transmitted through email via infected attachments or links present in the email body.

121. The correct answer is c) Falling victim to a virus-infected email attachment can result in the loss or corruption of files and data on the affected computer.

122. The correct answer is c) To protect themselves from email-based viruses, individuals should install antivirus software and keep it regularly updated.

123. The correct answer is c) Email viruses are often spread through mass email distribution to unsuspecting recipients.

124. The correct answer is c) Users can identify potential email viruses by examining the email's subject line, which may contain suspicious or misleading information.

125. The correct answer is b) A Trojan horse virus disguises itself as a legitimate program but performs malicious actions in the background.

126. The correct answer is b) A worm virus spreads by replicating and sending copies of itself to other computers.

127. The correct answer is c) A boot sector virus infects the boot sector of a computer's hard drive.

128. The correct answer is c) Ransomware locks or encrypts files and demands a ransom for their release.

129. The correct answer is c) A keylogger virus captures keystrokes entered by a user to collect sensitive information such as passwords and credit card details.

130. The correct answer is c) A logic bomb virus activates when a specific condition or event occurs, causing malicious actions.

131. The correct answer is b) Adware displays unwanted advertisements or redirects web browsers to specific websites.

132. The correct answer is c) A botnet virus creates a network of infected computers controlled by a central attacker for malicious purposes.

Database Concepts

1. What is the full form of DBMS?
 - a) Data of Binary Management System
 - b) Database Management System
 - c) Database Management Service
 - d) Data Backup Management System
2. What is a database?
 - a) Organized collection of information that cannot be accessed, updated, and managed
 - b) Collection of data or information without organizing
 - c) Organized collection of data or information that can be accessed, updated, and managed
 - d) Organized collection of data that cannot be updated
3. What is DBMS?
 - a) DBMS is a collection of queries
 - b) DBMS is a high-level language
 - c) DBMS is a programming language
 - d) DBMS stores, modifies and retrieves data
4. Who created the first DBMS?
 - a) Edgar Frank Codd
 - c) Charles Babbage
 - d) Sharon B. Codd
5. Which type of data can be stored in the database?
 - a) Image oriented data
 - b) Text, files containing data
 - c) Data in the form of audio or video
 - d) All of the above
6. In which of the following formats data is stored in the database management system?
 - a) Image
 - b) Text
 - c) Table
 - d) Graph
7. Which of the following is not a type of database?
 - a) Hierarchical
 - b) Network
 - c) Distributed
 - d) Decentralized
8. Which of the following is not an example of DBMS?

@ISS COACHING DELHI SUNRISE CLASSES

SERVICE, TRUST & RESULT

SUNRISE CLASSES

- a) MySQL
b) Microsoft Access
c) IBM DB2
d) Google
9. Which of the following is not a feature of DBMS?
- a) Minimum Duplication and Redundancy of Data
b) High Level of Security
c) Single-user Access only
d) Support ACID Property
10. Which of the following is a feature of the database?
- a) No-backup for the data stored
b) User interface provided
c) Lack of Authentication
d) Store data in multiple locations
11. Which of the following is not a function of the database?
- a) Managing stored data
b) Manipulating data
c) Security for stored data
d) Analysing code
12. Which of the following is a function of the DBMS?
- a) Storing data
b) Providing multi-users access control
c) Data Integrity
d) All of the above
- View Answer
13. Which of the following is a component of the DBMS?
- a) Data
b) Data Languages
c) Data Manager
d) All of the above
14. Which of the following is known as a set of entities of the same type that share same properties, or attributes?
- a) Relation set
b) Tuples
c) Entity set
d) Entity Relation model
15. What is information about data called?
- a) Hyper data
b) Tera data
c) Meta data
d) Relations
16. What does an RDBMS consist of?
- a) Collection of Records

SUNRISE CLASSES

- b) Collection of Keys
c) Collection of Tables
d) Collection of Fields
17. The values appearing in given attributes of any tuple in the referencing relation must likewise occur in specified attributes of at least one tuple in the referenced relation, according to _____ integrity constraint.
- a) Referential
b) Primary
c) Referencing
d) Specific
18. _____ is a hardware component that is most important for the operation of a database management system.
- a) Microphone
b) High speed, large capacity disk to store data
c) High-resolution video display
d) Printer
19. The DBMS acts as an interface between _____ and _____ of an enterprise-class system.
- a) Data and the DBMS
b) Application and SQL
c) Database application and the database
d) The user and the software
20. The ability to query data, as well as insert, delete, and alter tuples, is offered by _____
- a) TCL (Transaction Control Language)
b) DCL (Data Control Language)
c) DDL (Data Definition Language)
d) DML (Data Manipulation Language)
21. _____ is a set of one or more attributes taken collectively to uniquely identify a record.
- a) Primary Key
b) Foreign key
c) Super key
d) Candidate key
22. Which command is used to remove a relation from an SQL?
- a) Drop table
b) Delete
c) Purge
d) Remove
23. Which of the following set should be associated with weak entity set for weak entity to be meaningful?
- a) Neighbour set
b) Strong entity set

@ISS COACHING DELHI SUNRISE CLASSES

c) Owner set

d) Identifying set

24. Which of the following command is correct to delete the values in the relation teaches?

a) Delete from teaches;

b) Delete from teaches where Id = 'Null';

c) Remove table teaches;

d) Drop table teaches;

25. Procedural language among the following is _____

a) Domain relational calculus

b) Tuple relational calculus

c) Relational algebra

d) Query language

26. _____ operations do not preserve non-matched tuples.

a) Left outer join

b) Inner join

c) Natural join

d) Right outer join

27. Which forms have a relation that contains information about a single entity?

a) 4NF

b) 2NF

c) 5NF

d) 3NF

28. The top level of the hierarchy consists of _____ each of which can contain _____.

a) Schemas, Catalogs

b) Schemas, Environment

c) Environment, Schemas

d) Catalogs, Schemas

29. _____ indicates the maximum number of entities that can be involved in a relationship.

a) Greater Entity Count

b) Minimum cardinality

c) Maximum cardinality

d) ERD

30. The user IDs can be added or removed using which of the following fixed roles?

a) db_sysadmin

b) db_accessadmin

c) db_securityadmin

d) db_setupadmin

31. Why the following statement is erroneous?

SELECT dept_name, ID, avg (salary)

FROM instructor

GROUP BY dept_name;

@ISS COACHING DELHI SUNRISE CLASSES

SUNRISE CLASSES

a) Dept_id should not be used in group by clause

b) Group by clause is not valid in this query

c) Avg(salary) should not be selected

d) None

32. The traditional storage of data organized by the customer, stored in separate folders in filing cabinets is an example of _____ type of 'database' management system.

a) Object-oriented database management system

b) Relational database management system

c) Network database management system

d) Hierarchical database management system

33. After groups have been established, SQL applies predicates in the _____ clause, allowing aggregate functions to be used.

a) Where

b) Having

c) Group by

d) With

34. Which of the following is not the utility of DBMS?

i) Backup ii) Loading iii) Process Organization iv) File organization

a) i, ii, and iv only

b) i, ii and iii only

c) i, iii and iv only

d) All i, ii, iii, and iv

35. What does a foreign key combined with a primary key create?

a) Network model between the tables that connect them

b) Parent-Child relationship between the tables that connects them

c) One to many relationship between the tables that connects them

d) All of the mentioned

36. Which of the following is correct according to the technology deployed by DBMS?

a) Pointers are used to maintain transactional integrity and consistency

b) Cursors are used to maintain transactional integrity and consistency

c) Locks are used to maintain transactional integrity and consistency

d) Triggers are used to maintain transactional integrity and consistency

37. Which of the following is correct regarding the file produced by a spreadsheet?

- a) can be used as it is by the DBMS
- b) stored on disk in an ASCII text format
- c) all of the mentioned
- d) none of the mentioned

38. What is the function of the following command?

Delete from r where P;

- a) Clears entries from relation
- b) Deletes relation
- c) Deletes particular tuple from relation
- d) All of the mentioned

39. _____ resembles Create view.

- a) Create table . . . as
- b) Create view as
- c) Create table . . . like
- d) With data

40. The query specifying the SQL view is said to be updatable if it meets which of the following conditions?

- a) select clause contains relation attribute names but not have expressions, aggregates, or distinct specification

b) from clause has 1 relation

c) query does not have group by or having clause

d) All of the mentioned

41. When the "ROLLUP" operator for expression or columns within a "GROUP BY" clause is used?

a) Find the groups that make up the subtotal in a row

b) Create group-wise grand totals for the groups indicated in a GROUP BY clause

c) Group expressions or columns specified in a GROUP BY clause in one direction, from right to left, for computing the subtotals

d) To produce a cross-tabular report for computing subtotals by grouping phrases or columns given within a GROUP BY clause in all available directions

42. Which of the following is the best way to represent the attributes in a large db?

- a) Dot representation
- b) Concatenation
- c) Relational-and
- d) All of the mentioned

43. Which of the following is the subset of SQL commands used to

manipulate Oracle Structures, including tables?

- a) Data Described Language
- b) Data Retrieval Language
- c) Data Manipulation Language
- d) Data Definition Language

44. Which of the following functions construct histograms and use buckets for ranking?

- a) Nth()
- b) Newtil()
- c) Rank()
- d) All of the mentioned

45. _____ command is used in SQL to issue multiple CREATE TABLE, CREATE VIEW and GRANT statements in a single transaction.

- a) CREATE CLUSTER
- b) CREATE PACKAGE
- c) CREATE SCHEMA
- d) All of the mentioned

46. Which of the following key is required in to handle the data when the encryption is applied to the data so that the unauthorised user cannot access the data?

- a) Primary key
- b) Authorised key

c) Encryption key

d) Decryption key

View Answer

47. Which of the following is known as the process of viewing cross-tab with a fixed value of one attribute?

- a) Dicing
- b) Pivoting
- c) Slicing
- d) Both Pivoting and Dicing

48. For designing a normal RDBMS which of the following normal form is considered adequate?

- a) 4NF
- b) 3NF
- c) 2NF
- d) 5NF

49. Which of the following is popular for applications such as storage of log files in a database management system since it offers the best write performance?

- a) RAID level 0
- b) RAID level 1
- c) RAID level 2
- d) RAID level 3

50. Which of the following represents a query in the tuple relational calculus?

- a) $\{ \{P(t) \mid t\} \}$
- b) $\{t \mid P(t)\}$
- c) $t \mid P(t) \mid t$
- d) All of the mentioned

51. The oldest DB model is

- a) Network
- b) Physical
- c) Hierarchical
- d) Relational

52. Evaluate the statements issued by the DBA in the given sequence if OE and SCOTT are the users and the ORDERS table is owned by OE.

CREATE ROLE r1;

GRANT SELECT, INSERT ON oe.orders TO r1;

GRANT r1 TO scott;

GRANT SELECT ON oe.orders TO scott;

REVOKE SELECT ON oe.orders FROM scott;

What would be the outcome after executing the statements?

a) The REVOKE statement would give an error because the SELECT privilege has been granted to the role R1

b) The REVOKE statement would remove the SELECT privilege from SCOTT as well as from the role R1

c) SCOTT would be able to query the OE.ORDERS table

d) SCOTT would not be able to query the OE.ORDERS table

53. Which of the following establishes a top-to-bottom relationship among the items?

- a) Relational schema
- b) Network schema
- c) Hierarchical schema
- d) All of the mentioned

54. A major goal of the db system is to minimize the number of block transfers between the disk and memory. Which of the following helps in achieving this goal?

- a) Secondary storage
- b) Storage
- c) Catalog
- d) Buffer

55. What happens if a piece of data is stored in two places in the db?

56. The logical design, and the snapshot of the data at a given instant in time is known as?

a) Instance & Relation

b) Relation & Schema

c) Domain & Schema

d) Schema & Instance

57. A relational database consists of a collection of

a) Tables

b) Fields

c) Records

d) Keys

58. A _____ in a table represents a relationship among a set of values.

a) Column

b) Key

c) Row

d) Entry

59. The term _____ is used to refer to a row.

a) Attribute

b) Tuple

c) Field

d) Instance

60. The term attribute refers to a _____ of a table.

a) Record

b) Column

c) Tuple

d) Key

61. For each attribute of a relation, there is a set of permitted values, called the _____ of that attribute.

a) Domain

b) Relation

c) Set

d) Schema

62. Database _____ which is the logical design of the database, and the database _____ which is a snapshot of the data in the database at a given instant in time.

a) Instance, Schema

b) Relation, Schema

c) Relation, Domain

d) Schema, instance

63. Course(course_id,sec_id,semester)

Here the course_id,sec_id and semester are _____ and course is a _____

- a) Relations, Attribute
- b) Attributes, Relation
- c) Tuple, Relation
- d) Tuple, Attributes

64. Department (dept name, building, budget) and Employee (employee_id, name, dept name, salary)

Here the dept_name attribute appears in both the relations. Here using common attributes in relation schema is one way of relating _____ relations.

- a) Attributes of common
- b) Tuple of common
- c) Tuple of distinct
- d) Attributes of distinct

65. A domain is atomic if elements of the domain are considered to be _____ units.

- a) Different
- b) Indivisible
- c) Constant
- d) Divisible

66. The tuples of the relations can be of _____ order.

- a) Any
- b) Same
- c) Sorted
- d) Constant

67. Which one of the following is a set of one or more attributes taken collectively to uniquely identify a record?

- a) Candidate key
- b) Sub key
- c) Super key
- d) Foreign key

68. Consider attributes ID, CITY and NAME. Which one of this can be considered as a super key?

- a) NAME
- b) ID
- c) CITY
- d) CITY, ID

69. The subset of a super key is a candidate key under what condition?

- a) No proper subset is a super key
- b) All subsets are super keys
- c) Subset is a super key
- d) Each subset is a super key

SUNRISE CLASSES

70. A _____ is a property of the entire relation, rather than of the individual tuples in which each tuple is unique.

- a) Rows
- b) Key
- c) Attribute
- d) Fields

71. Which one of the following attribute can be taken as a primary key?

- a) Name
- b) Street
- c) Id
- d) Department

72. Which one of the following cannot be taken as a primary key?

- a) Id
- b) Register number
- c) Dept_id
- d) Street

73. An attribute in a relation is a foreign key if the _____ key from one relation is used as an attribute in that relation.

- a) Candidate
- b) Primary
- c) Super
- d) Sub

74. The relation with the attribute which is the primary key is referenced in another relation. The relation which has the attribute as a primary key is called _____

- a) Referential relation
- b) Referencing relation
- c) Referenced relation
- d) Referred relation

75. The _____ is the one in which the primary key of one relation is used as a normal attribute in another relation.

- a) Referential relation
- b) Referencing relation
- c) Referenced relation
- d) Referred relation

76. A _____ integrity constraint requires that the values appearing in specified attributes of any tuple in the referencing relation also appear in specified attributes of at least one tuple in the referenced relation.

- a) Referential
- b) Referencing
- c) Specific
- d) Primary

77. Using which language can a user request information from a database?

c) Structural

d) Compiler

78. Student(ID, name, dept name, tot_cred)

In this query which attributes form the primary key?

a) Name

b) Dept

c) Tot_cred

d) ID

79. Which one of the following is a procedural language?

a) Domain relational calculus

b) Tuple relational calculus

c) Relational algebra

d) Query language

80. The _____ operation allows the combining of two relations by merging pairs of tuples, one from each relation, into a single tuple.

a) Select

b) Join

c) Union

d) Intersection

81. The result which operation contains all pairs of tuples from the

two relations, regardless of whether their attribute values match.

a) Join

b) Cartesian product

c) Intersection

d) Set difference

82. The _____ operation performs a set union of two "similarly structured" tables

a) Union

b) Join

c) Product

d) Intersect

83. The most commonly used operation in relational algebra for projecting a set of tuple from a relation is

a) Join

b) Projection

c) Select

d) Union

84. The _____ operator takes the results of two queries and returns only rows that appear in both result sets.

a) Union

b) Intersect

c) Difference

@ISS COACHING DELHI SUNRISE CLASSES

d) Projection

85. A _____ is a pictorial depiction of the schema of a database that shows the relations in the database, their attributes, and primary keys and foreign keys.

- a) Schema diagram
- b) Relational algebra
- c) Database diagram
- d) Schema flow

86. The _____ provides a set of operations that take one or more relations as input and return a relation as an output.

- a) Schematic representation
- b) Relational algebra
- c) Scheme diagram
- d) Relation flow

87. Which one of the following is used to define the structure of the relation, deleting relations and relating schemas?

- a) DML(Data Manipulation Language)
- b) DDL(Data Definition Language)
- c) Query
- d) Relational Schema

88. Which one of the following provides the ability to query information from the database and to

insert tuples into, delete tuples from, and modify tuples in the database?

- a) DML(Data Manipulation Language)
- b) DDL(Data Definition Language)
- c) Query
- d) Relational Schema

89. CREATE TABLE employee (name VARCHAR, id INTEGER)

What type of statement is this?

- a) DML
- b) DDL
- c) View
- d) Integrity constraint

90. SELECT * FROM employee

What type of statement is this?

- a) DML
- b) DDL
- c) View
- d) Integrity constraint

91. The basic data type char(n) is a _____ length character string and varchar(n) is _____ length character.

- a) Fixed, equal
- b) Equal, variable
- c) Fixed, variable
- d) Variable, equal

- b) 20, 4
- c) 20, 20
- d) 3, 4

93. To remove a relation from an SQL database, we use the _____ command.

- a) Delete
- b) Purge
- c) Remove
- d) Drop table

94. DELETE FROM r; //r - relation

This command performs which of the following action?

- a) Remove relation
- b) Clear relation entries
- c) Delete fields
- d) Delete rows

95. INSERT INTO instructor VALUES (10211, 'Smith', 'Biology', 66000);

What type of statement is this?

- a) Query

b) DML

c) Relational

d) DDL

96. Updates that violate _____ are disallowed.

- a) Integrity constraints
- b) Transaction control
- c) Authorization
- d) DDL constraints

97. The union operation is represented by

- a) $\cap$
- b) $\cup$
- c) $-$
- d) $*$

98. The intersection operator is used to get the _____ tuples.

- a) Different
- b) Common
- c) All
- d) Repeating

d) Repeating

99. The union operation automatically _____ unlike the select clause.

- a) Adds tuples
- b) Eliminates unique tuples
- c) Adds common tuples
