

SUNRISE CLASSES

28. Which unit of a computer system is responsible for storing frequently accessed data and instructions to improve system performance?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Secondary Storage Unit

29. Which unit of a computer system is responsible for coordinating the flow of data between the CPU, memory, and input/output devices?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Input/Output (I/O) Controller

30. Which unit of a computer system is responsible for permanently storing the computer's firmware and BIOS?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Read-Only Memory (ROM)

31. Which unit of a computer system is responsible for coordinating the execution of instructions and managing the flow of data?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Secondary Storage Unit

32. Which unit of a computer system is responsible for temporarily storing the results of calculations performed by the CPU?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Arithmetic Logic Unit (ALU)

33. Which unit of a computer system is responsible for managing and controlling the interaction between the computer hardware and software?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Operating System

34. Which unit of a computer system is responsible for providing non-volatile storage for data and programs?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Secondary Storage Unit

35. Which unit of a computer system is responsible for converting analog signals from external devices into digital signals for processing?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Analog-to-Digital Converter (ADC)

36. Which unit of a computer system is responsible for managing the input and output operations between the computer and peripheral devices?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Input/Output (I/O) Controller

37. Which unit of a computer system is responsible for performing arithmetic calculations and logical operations?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Arithmetic Logic Unit (ALU)

38. Which unit of a computer system is responsible for storing frequently accessed instructions and data to speed up processing?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Secondary Storage Unit

39. Which unit of a computer system is responsible for managing the communication between the CPU, memory, and peripheral devices?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Input/Output (I/O) Controller

40. Which unit of a computer system is responsible for storing permanent firmware and system settings?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Read-Only Memory (ROM)

41. Which unit of a computer system is responsible for fetching instructions from memory and decoding them for execution?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)

c) Control Unit

d) Arithmetic Logic Unit (ALU)

42. Which unit of a computer system is responsible for temporarily storing data that is being processed by the CPU?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Secondary Storage Unit

43. Which unit of a computer system is responsible for managing the storage and retrieval of data on external storage devices?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Secondary Storage Unit

44. Which unit of a computer system is responsible for executing program instructions and performing calculations?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Input/Output (I/O) Unit

45. Which unit of a computer system is responsible for temporarily storing the operands and intermediate results of arithmetic and logical operations?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Arithmetic Logic Unit (ALU)

d) Arithmetic Logic Unit (ALU)

46. Which unit of a computer

system is responsible for managing

SUNRISE CLASSES

the allocation and deallocation of memory resources?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Operating System

47. Which unit of a computer system is responsible for converting digital signals from the CPU into analog signals for output to external devices?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Digital-to-Analog Converter (DAC)

48. Which unit of a computer system is responsible for managing the communication between the CPU, memory, and other internal components?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Motherboard

49. Which unit of a computer system is responsible for storing the operating system, applications, and user data?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit

63. Which unit of a computer system is responsible for storing the results of completed calculations performed by the CPU?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Output Buffer

SUNRISE CLASSES

64. Which unit of a computer system is responsible for managing the physical and logical addresses of data in the memory?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Memory Management Unit (MMU)

65. Which unit of a computer system is responsible for storing frequently accessed data to improve system performance?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Cache Memory

66. Which unit of a computer system is responsible for executing the instructions provided by the control unit?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Instruction Execution Unit

67. Which unit of a computer system is responsible for storing data and instructions that are currently being processed by the CPU?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Working Memory

68. Which unit of a computer system is responsible for managing the interaction between the computer and external devices

through input and output operations?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Input/Output (I/O) Controller

69. Which unit of a computer system is responsible for providing long-term storage for data and programs, even when the computer is turned off?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Secondary Storage Unit

70. Which unit of a computer system is responsible for controlling the power supply and managing the flow of electricity within the computer?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Power Supply Unit (PSU)

71. Which unit of a computer system is responsible for converting binary data from the CPU into signals that can be transmitted over communication channels?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Modem

72. Which unit of a computer system is responsible for providing a temporary storage space for data that is being transferred between the CPU and external devices?

- a) Central Processing Unit (CPU)

SUNRISE CLASSES

- b) Random Access Memory (RAM)
- c) Control Unit
- d) Buffer

73. Which unit of a computer system is responsible for controlling the timing and sequencing of operations within the computer system?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Clock Generator

74. Which unit of a computer system is responsible for storing the initial instructions that are executed when the computer is powered on?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Bootstrap Loader

75. Which unit of a computer system is responsible for managing the flow of data between the CPU and memory?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Memory Controller

76. Which unit of a computer system is responsible for interpreting and executing instructions stored in memory?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Program Counter

77. Which unit of a computer system is responsible for storing

data that is waiting to be processed by the CPU?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Input Queue

78. Which unit of a computer system is responsible for converting digital signals from the CPU into analog signals for output to audio devices?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Digital-to-Analog Converter (DAC)

79. Which unit of a computer system is responsible for managing the transfer of data between the CPU and external storage devices?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Disk Controller

80. Which unit of a computer system is responsible for coordinating the execution of instructions and managing the overall operation of the computer system?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Operating System

81. Which unit of a computer system is responsible for managing the addressing and retrieval of data from primary storage?

- a) Central Processing Unit (CPU)

- b) Random Access Memory (RAM)
- c) Control Unit
- d) Output Controller

151. Which unit of a computer system is responsible for performing complex mathematical calculations and floating-point operations?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Floating-Point Unit (FPU)

152. Which unit of a computer system is responsible for storing the data and instructions that the CPU needs to access quickly?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Cache Memory

153. Which unit of a computer system is responsible for coordinating the transfer of data between the CPU and input/output devices?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Input/Output (I/O) Controller

154. Which unit of a computer system is responsible for managing the allocation and deallocation of memory resources?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Memory Management Unit (MMU)

155. Which unit of a computer system is responsible for temporarily storing data during the execution of instructions?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Data Register

156. Which unit of a computer system is responsible for managing the flow of data between the CPU and secondary storage devices?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Storage Controller

157. Which unit of a computer system is responsible for converting digital signals from the CPU into analog signals for output to display devices?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Graphics Processing Unit (GPU)

158. Which unit of a computer system is responsible for storing frequently accessed instructions and data to improve processing speed?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Instruction Cache

159. Which unit of a computer system is responsible for managing the interaction between the CPU and input devices?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Input Controller

160. Which unit of a computer system is responsible for managing the flow of data between the CPU and output devices?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Output Controller

151. Which unit of a computer system is responsible for performing complex mathematical calculations and floating-point operations?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Floating-Point Unit (FPU)

152. Which unit of a computer system is responsible for storing the data and instructions that the CPU needs to access quickly?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Cache Memory

153. Which unit of a computer system is responsible for coordinating the transfer of data between the CPU and input/output devices?

- a) Central Processing Unit (CPU)

172. Which unit of a computer system is responsible for managing the storage and retrieval of data from magnetic storage devices such as hard drives?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Disk Controller

173. Which unit of a computer system is responsible for converting analog signals from a microphone into digital signals that can be processed by the CPU?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Audio Interface Unit

174. Which unit of a computer system is responsible for managing the interaction between the CPU and graphics devices such as graphics cards and monitors?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Graphics Interface Unit

175. Which unit of a computer system is responsible for temporarily storing the address of the next instruction to be executed?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Program Counter

176. Which unit of a computer system is responsible for managing the interaction between the CPU and communication devices such as network cards and modems?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Communication Interface Unit

177. Which unit of a computer system is responsible for decoding the instructions fetched from memory and generating control signals for the CPU?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Instruction Decoder

178. Which unit of a computer system is responsible for managing the interaction between the CPU and peripheral devices such as printers and scanners?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Peripheral Interface Unit

179. Which unit of a computer system is responsible for managing the allocation and deallocation of resources for multiple running processes?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Operating System

180. Which unit of a computer system is responsible for managing the power supply and distributing

power to various components of the computer?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Power Supply Unit (PSU)

181. Which unit of a computer system is responsible for decoding the memory address of data to be fetched or stored?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Memory Address Decoder

182. Which unit of a computer system is responsible for managing the flow of data between the CPU and the graphics memory?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Graphics Memory Controller

183. Which unit of a computer system is responsible for managing the interaction between the CPU and the keyboard, mouse, and other input devices?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Input-Output Controller

184. Which unit of a computer system is responsible for managing the execution of arithmetic and logic operations?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Arithmetic Logic Unit (ALU)

185. Which unit of a computer system is responsible for managing the interaction between the CPU and the system clock?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Clock Generator

186. Which unit of a computer system is responsible for managing the interaction between the CPU and external storage devices such as USB drives and memory cards?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Storage Interface Unit

187. Which unit of a computer system is responsible for storing the result of arithmetic and logic operations?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Accumulator

188. Which unit of a computer system is responsible for managing the interaction between the CPU and the network interface card?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Network Interface Controller

189. Which unit of a computer system is responsible for managing the interaction between the CPU and external devices such as printers and scanners?

190. Which unit of a computer system is responsible for managing the flow of instructions and data between the CPU and the main memory?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Memory Bus Controller

191. Which unit of a computer system is responsible for managing the interaction between the CPU and the sound card for audio input and output?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Sound Interface Unit

192. Which unit of a computer system is responsible for managing the interaction between the CPU and the display devices such as monitors and projectors?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Display Controller

193. Which unit of a computer system is responsible for managing the interaction between the CPU and the network for data transmission?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Network Interface Unit

194. Which unit of a computer system is responsible for managing the interaction between the CPU and the optical drives for reading and writing data?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Optical Drive Controller

195. Which unit of a computer system is responsible for managing the interaction between the CPU and the touch screen devices for input and output?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Touch Interface Unit

196. Which unit of a computer system is responsible for managing the interaction between the CPU and the printer for printing documents?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Printer Controller

197. Which unit of a computer system is responsible for managing the interaction between the CPU and the video capture devices for capturing and recording videos?

- a) Central Processing Unit (CPU)
- b) Random Access Memory (RAM)
- c) Control Unit
- d) Video Capture Interface Unit

198. Which unit of a computer system is responsible for managing the interaction between the CPU
